Hi Angie. Here is the link to the Small Quantity Generator disposal program - <http://www.lhwmp.org/home/BHW/sqg.aspx>. Please download the form and fill it out prior to visiting the South Seattle Haz site (<http://www.lhwmp.org/home/HHW/disposal-locations.aspx#south>). I have cleared the material but can you send me the name of the contracted hauler that will be bringing the material? Can you also let me know the day and approximate time of the visit so I can pass on to the site staff?

Lastly, can you give me the information for the contact person at Ecology? I sort of want to back track and see how all this found its way to you and your agency. I believe there are other processes in place for handling illegally dumped material on a property within a city so I just want to do a little checking for future occurrences. Thanks and call if you have questions.

Subject: Abandoned Containers

Julie,
It was nice talking to you this morning. Below the details of the incident.

Two START contractors and I arrived on site at 1830 in response to a notification by Skyline Electric located at

3619 7th Ave S., Seattle, WA 98134, of abandoned containers near their facility. The following containers were identified:

- one 5-gallon bucket contained oil
- one 5-gallon bucket contained an unidentified black water-like liquid
- one 5-gallon bucket contained an unidentified paint
- one 5-gallon bucket was labeled joint compound
- one 1-gallon jug was labeled 30% muriatic acid
- one 1-gallon jug was labeled as anti-freeze
- one 1-gallon jug contained transmission fluid
- two 1-gallon jugs contained motor oil

Sincerely,

Angie Zavala
